Girls in STEM Outreach Fellow—Yale Ciencia Initiative-Seeds of Success

Mentor: Giovanna Guerrero-Medina, Principal Investigator / Director, Yale Ciencia Initiative-Seeds of Success, Yale Ciencia Initiative-Seeds of Success

Fellow Title: Girls in STEM Outreach Fellow—Yale Ciencia Initiative-Seeds of Success

Organization Name: Yale Ciencia Initiative-Seeds of Success

Organization Website: <https://www.cienciapr.org/en/seeds-success>

Organization Description:

The Seeds of Success is an NIH-funded program that aims to engage middle school girls with the exciting world of science, technology, engineering, and mathematics (STEM) through fun STEM activities, mentoring, and opportunities for them to practice their leadership skills to become STEM Ambassadors in their communities. The educational activities are designed and offered by female scientists and engineers that serve as role models and help the students learn about different careers in these disciplines and how they contribute to society and beyond.

GPE Fellow Responsibilities:

Support the planning and execution of this year's cohort of Seeds of Success. Specifically, you will help to establish and foster relationships with mentors by aiding in recruitment efforts. Facilitate the matching process of mentors and mentees. Track the progress of that mentoring relationship and assess the outcome of the process.

Desired GPE Fellow Qualifications:

- Demonstrated interest in improving diversity, equity, and inclusion in STEM
- Can work independently, self-driven.
- Attend bi-weekly team meetings in-person or over zoom.
- Attend weekly 1on1 meetings in-person or over zoom.

GPE Fellow Learning Objectives:

- Manage a community of mentors and mentees to ensure they have a successful mentoring relationship.
- Design educational activities around the concepts of leadership and community outreach

to enrich the program's sessions.
